Project Details

Degree Project Name : Crime Analysis And Prediction System

Description: Crimes are a social nuisance and it has a direct effect on a society. Governments spend lots of money through law enforcement agencies to try and stop crimes from taking place. Today, many law enforcement bodies have large volumes of data related to crimes, which need to be processed to turn into useful information. A crime is a deliberate act that causes physical or psychological harm, damage to or loss of property, and is against the law. The successful implementation of crime prediction and analysis can lead to significant improvements in public safety. By predicting potential crime hotspots and times, law enforcement agencies can allocate resources more effectively, enhance patrol strategies, and Crime Analysis And Prediction System , potentially prevent crimes before they occur. Furthermore, the analysis of crime patterns can provide valuable insights for policymakers to address the root causes of criminal behavior and develop long-term solutions.
